

# SofTest Workaround for Windows 10 Creators OS

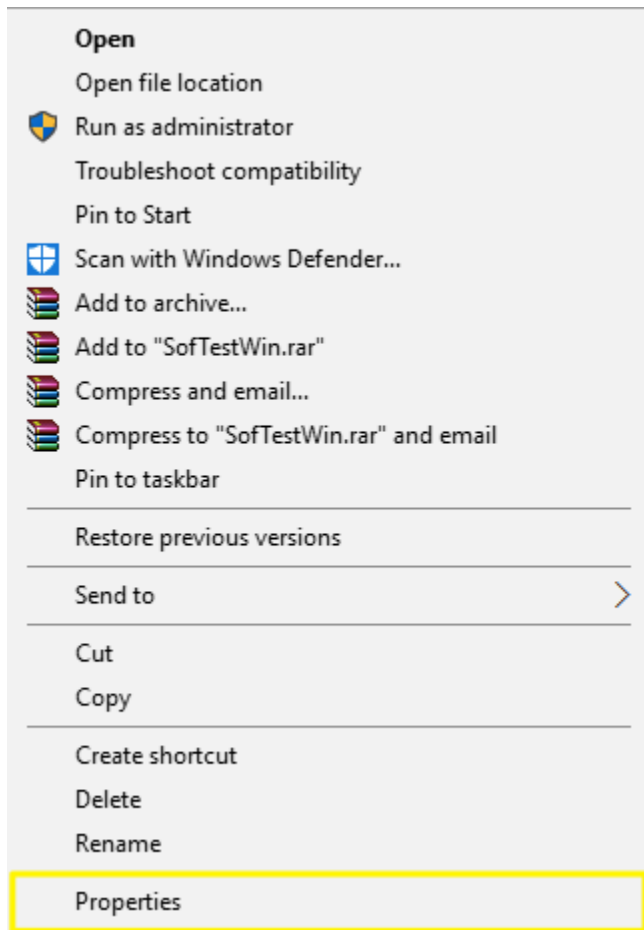

APRIL 19, 2017 [SOFIA MORALES](#)

*Note: We currently do NOT support the Windows 10 Creators operating system. This OS does not meet our minimum system requirements at this time.*

In order to utilize SofTest on a machine that is running Windows 10 Creators, you must make some changes within the properties of the application. Below are the steps for the available workaround:

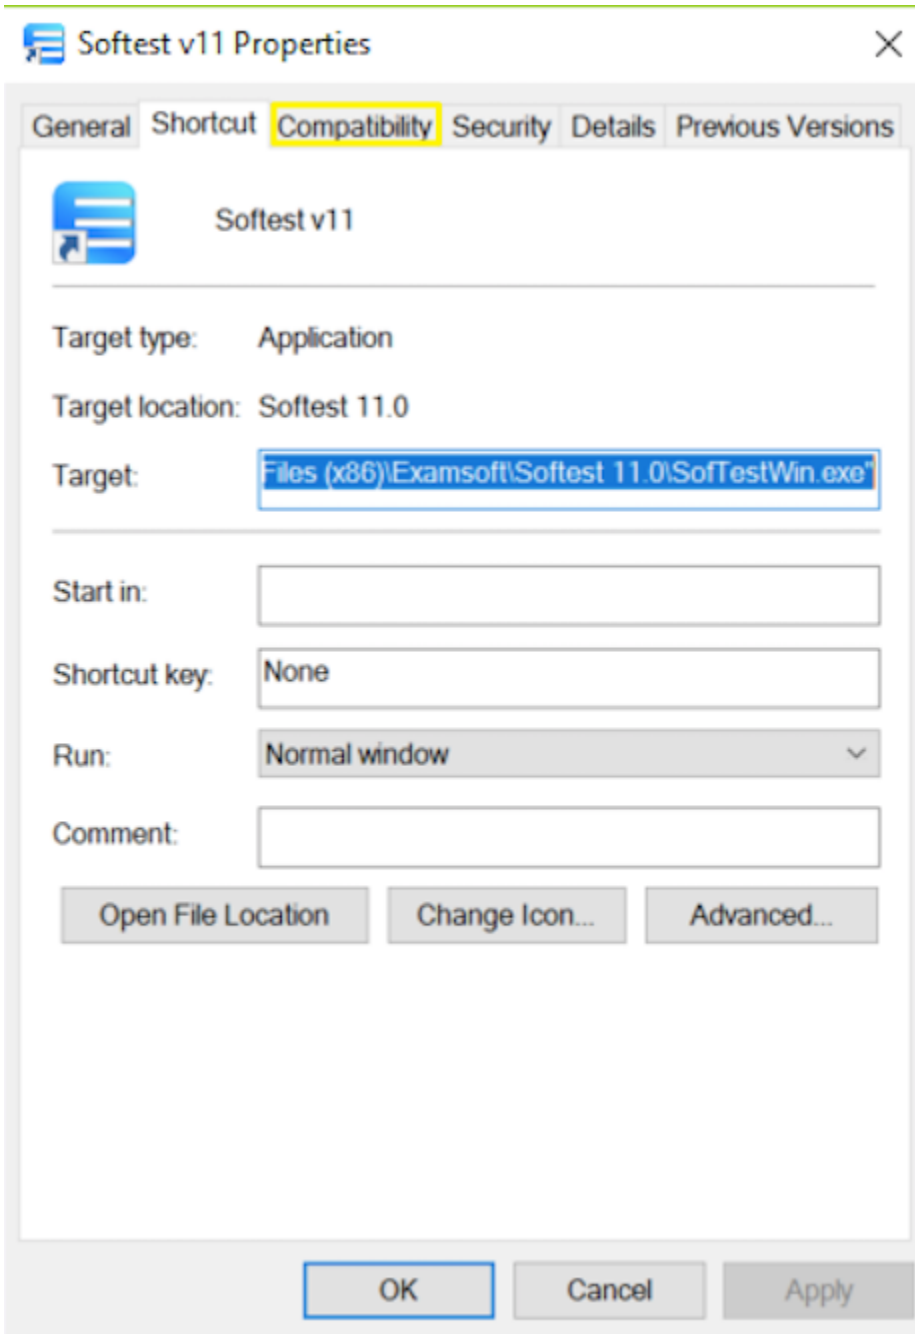

1. **Right click** on the SofTest application shortcut from the desktop or from the application icon at C:\Program Files (x86)\Examsoft\SofTest 11.0

2. Select **Properties** from the menu

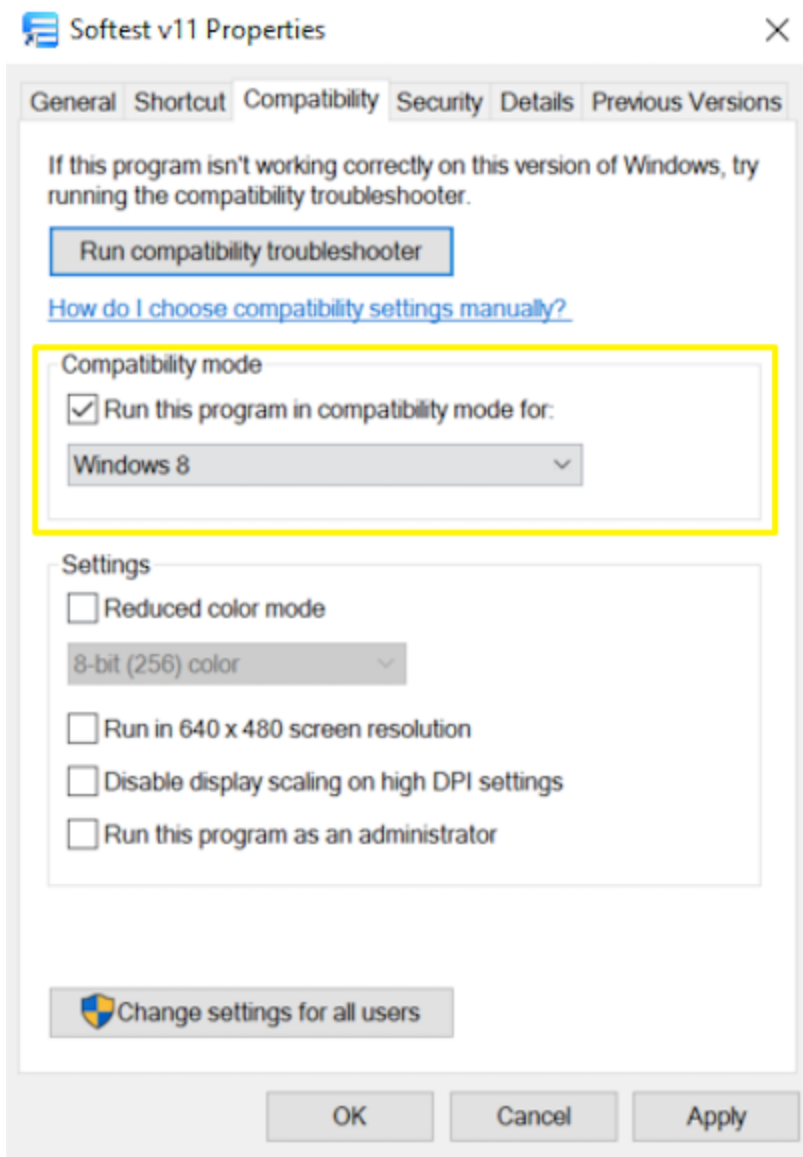

[continued next page]

3. Click on the **Compatibility** tab

4. Under **Compatibility mode**, check the box that says "*Run this program in compatibility mode for:*" and select **Windows 8** from the drop down

[continued next page]

- Click **Apply**, then **OK**

Once the above steps are completed, exam takers should be able to run SofTest, but keep in mind this operating system is not currently supported. Please contact the Support team if you have any questions.
